

NOTES:

THIS DRAWING SHOWS THE ENVELOPES OF THE QUAD AND THE BS STRUCTURES IN THE FM CONFIGURATION, WITH THE STRUCTURES AS CLOSE TOGETHER AS THEY CAN PRACTICALLY BE.

THERE IS ONE AREA THAT IS SHOWN HERE AS AN INTERFERENCE, AND THIS IS THE ENVELOPE FOR THE DOG CLAMPS. THE CLAMPS CAN BE PLACED ANYWHERE WITHIN THE ENVELOPE STATED, AND THERE IS THEREFORE NO REASON THAT THERE SHOULD BE ANY INTERFERENCE IN REALITY, SO LONG AS THE DOG CLAMPS ARE PLACED STRATEGICALLY.

IT IS BELIEVED THAT IT WILL NOT BE NECESSARY TO USE STAYS IN THE FM CONFIGURATION, SINCE THE TWO STRUCTURES CAN BE MADE TO REINFORCE EACH OTHER, BUT THIS IS STILL TO BE DECIDED WHEN THE OPTICAL LAYOUT HAS BEEN COMPLETED.
