

Dawn IV: Objectives

David Shoemaker

LIGO-G1801630-v2

Agenda: This morning

- *Session 1: 09:00 - 12:00* **Chair: Reitze**
- Intro/Objectives for this particular Dawn meeting (10+10):
Shoemaker
- Progress on action items in the Dawn III report (25+5):
Mclver/Cadonati
- Time constraints and opportunities in Europe, US, Australia, Asia
(10+10+10+10; each 8+2): **Reitze/Katsanevas//McClelland/Somiya**
- *Coffee break 10:30 - 11:00*
- Discussion on the evolving role of Dawn meetings (45): Moderator:
Berger

Agenda: this afternoon

- *Session 2: 13:30 - 18:00 Chair: van den Brand*
- 3G science case (25+20): **Sathya**
- Basic concepts for 3rd generation detectors (25+20): **Barsotti**
- R&D challenges and global progress (25+20): **Punturo**
- *Coffee break 15:45 - 16:15*
- The APPEC roadmap APPEC chairman, **Antonio Masiero** (30+15)
- Audience Discussion: What is the path forward for science on this scale? (60) Moderator: **van den Brand**

Agenda: Friday morning

- *Session 3: 09:00 - 12:30* **Chair: Cadonati**
- Astrophysics -- 3G network performance metrics -- (20+10): **Evan Hall**
- Trade of science gained at low frequencies vs. Observatory requirements (20+10): **Stefan Hild and Stefan Ballmer**
- Ideas for determining the roadmap between Adv+/A+ and 3G: **McClelland (20+10)**
- *Coffee break 10:30 - 11:00*
- Coatings -- roadmap to readiness (20+10) **Fejer**
- Computing requirements (20+10): **Porter**

Agenda: Friday afternoon

- *Session 4: 14:00 - 17:30* **Chair: Lueck**
- Community outreach and engagement (20+10): **Nissanke**
- Communication with and between funding agencies (20+20): **Rowan**
- *Coffee break 15:30-16:00*
- Discussion: summary of sessions (45): **4 Chairs**
- Identification of action items, assignment, time scales (30):
Moderator: **Shoemaker/Mclver**
- Last words (15): **Shoemaker**

State of 3G

- ET is the trailblazer with history almost a decade deep
- US efforts in domain were minimal until aLIGO was finished
- GWIC formed a task force in late 2016 to try to help structure and drive a community-wide and global effort in 3G
 - Significant effort in the Science Case, Coordination of R&D, and Governance
- ET intends to join the ESFRI roadmap
- 3G in the US has received study funding; GWs will appear in the 2020 Decadal Review in some form
- **The coming year is important for ‘catching waves’ in funding and community interest**

My goals for Dawn IV

- Facilitate discussions on a global rather than US-Centric scale for the path to 3G
- Work toward a unified very informal single umbrella organization for 3G
 - Don't need much more than agreement on the idea and a name for now

My goals for Dawn IV

- Inform and learn from funding agencies from US and Europe
 - Some representatives present esp. this afternoon
 - Have made an effort to make afternoon presentations that speak to that audience, communicate the state of the art
 - Also serves to get us all on the same page
 - Hope we get some guidance on how we can best navigate the path to funding for projects of this scale
- Develop a plan to create roadmap for 2.5 → 3G Epoch
- Develop a plan to create an Advocacy plan (talks, roadmaps, etc.)
- GWIC 3G committee ‘delivers’ on initial goals by ~Dec 2018. Get ideas for “What’s next”
